

22YL-220-7 220 - Portable Fall Protection Base Plate (Galvanized Steel Yellow Powder Coat)

Portable Guard Rail is an OSHA compliant fall protection guard rail system. Get OSHA compliant fast and easy without costly *custom* rail installation. SRC 360 - Portable Guard Rail allows installation of an OSHA compliant rail system without tools, welding or drilling. A two person maintenance crew can install over five hundred feet of rail per hour saving time and money. The 220 Galvanized Steel bases are simply placed along the fall perimeter and the steel rail is pinned in the base.* OSHA compliance is that easy!
