

A-J62 A-J - Adjust-A-Jaw Tensioner (1/8" Or 3/16")

DIMENSIONS									
Part No.	Material	Finish	Length	Thread	Thread Length	Thread Dia.	Thread Pitch	Thread Type	Notes
A-J62	304 SS	Polished	12.00	1/8"	4.00	0.375	18	UNC	
A-J62	304 SS	Polished	12.00	3/16"	4.00	0.500	18	UNC	

*Require Swaging a Ferrule to the cable.

You can use our Invisiware[®] fixed tabs or threaded tabs or lag eyes to mount Adjust-A-Jaw[®] tensioners to your end posts. Or you can mount them using flat bar or angle iron welded to your post with holes drilled to accept the clevis. See the tabulated drawing and chart below to determine how this fitting interfaces with your end post.

The clevis has a male thread that mates with the female thread within the body of the tensioner. The swaging ferrule is swaged onto the cable and holds the cable inside the body. The body rotates on the cable and provides a considerable amount of take-up during tensioning with an open-end wrench. After tensioning, the lock nut locks the assembly in place.
