

KK350-8 KK350 - Eave Fitting (Galvanized Steel)

The Type 350 fitting has been designed for small structural building applications and provides for significant load rating. When used with the Type 351 ridge fitting a truss arrangement for additional support can be achieved. Double set screws are provided on the truss outlet to provide additional pull out resistance to hold structures firmly together.

Part	Weight	A	D	E	F	G	H	Hatch- Length
350- 8	2.62 lbs.	8	3.27 in.	1.65 in.	1.85 in.	2.64 in.	2.36 in.	2.62 in.
